

## **DISABLING OF ACCOUNTS AFTER 30 DAYS INACTIVITY**

The requirement for disabling accounts after 30 days due to nonuse is a Security Technical Implementation Guidelines (STIG) requirements mandated by DISA which stipulates that all accounts are to be disabled after 30 days of inactivity/no access.

Our CIO also has stipulated in a DLA policy letter dated 6 November 2014 citing the same requirement. Due to our security requirements DLA is not able to implement policies or settings to the MEDALS application without any processes to disable accounts that are inactive.

A good practice to avoid important accounts from becoming disabled is to set a calendar reminder to log into these accounts before they expire.
